

Curriculum vitae

Personal data

Name: Frederico V.

Technical Knowledge and Skills

Javascript, CSS, React

Frederico V. is a developer out of love and vocation. His first contact with code was at the age of 12 and he never stopped until today, at the age of 32. He considers himself a very calm, objective, and sympathetic guy.

In his free time, he likes to play games on PC, watch movies and TV shows, play with my dog and go out with his girlfriend.

Video Streaming (Netflix-like)/Education

August 2020 - November 2020

Website: <https://www.youtube.com/watch?v=kancUEaQu7s>

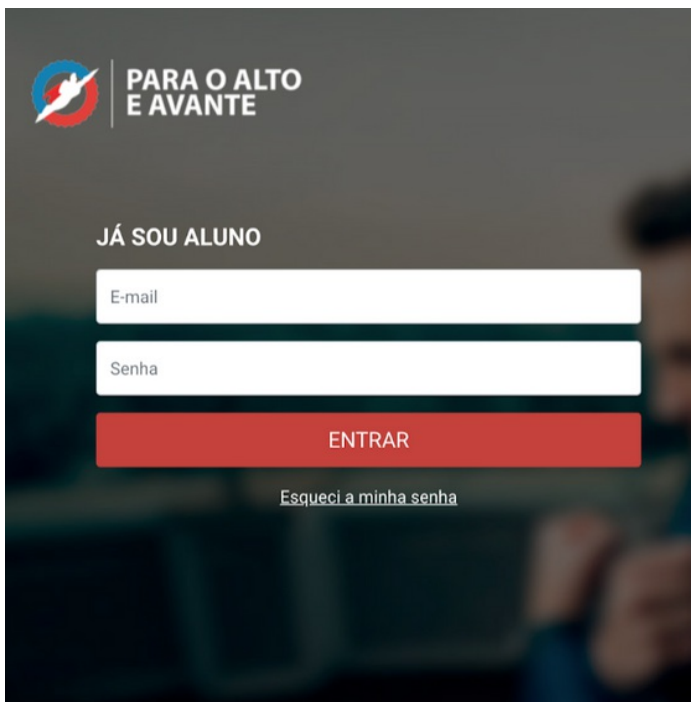

Description:

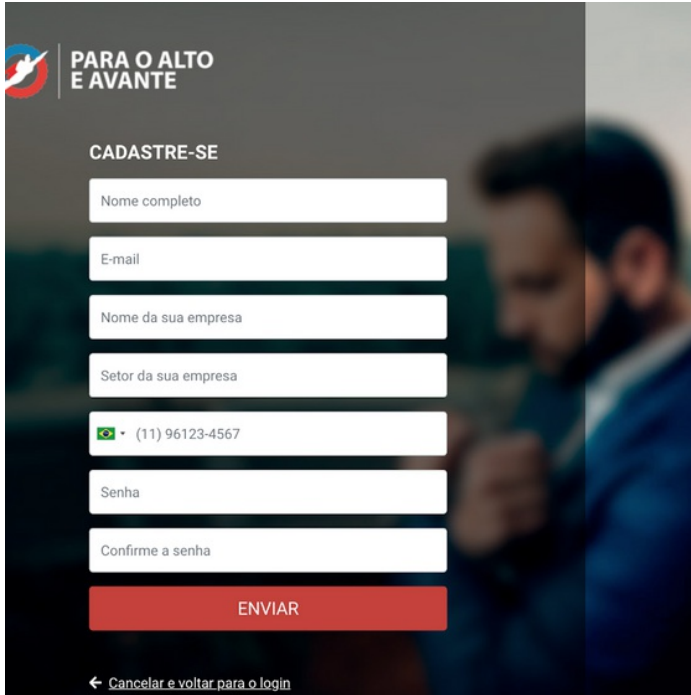

This was a Netflix-like project ordered by the same company as the Live Streaming project above. It was never deployed to production due to a change in the company's business

strategies. It's a shame. The following video is the UI prototype presentation that I recorded to sell the idea to the company's directors. After the approval, I worked some months on this project and left it 95% done, when it was canceled. <https://www.youtube.com/watch?v=kancUEaQu7s>

I worked on this project all by myself as a solo developer.
I also designed the UI myself on Adobe Xd.

Technologies used:
React, Laravel, MySQL

A registration form titled "PARA O ALTO E AVANTE" with a sub-header "CADASTRE-SE". The form includes input fields for "Nome completo", "E-mail", "Nome da sua empresa", "Setor da sua empresa", a phone number field with a Brazilian flag icon and the number "(11) 96123-4567", "Senha", and "Confirme a senha". A red "ENVIAR" button is at the bottom. A link "← Cancelar e voltar para o login" is at the bottom left. The background is a blurred image of a man in a blue shirt.

Live Streaming/Education

February 2020 - July 2020

Website: <https://live.aulaavivo.com.br/lives>

Description:

This is a closed platform where teachers can broadcast online real-time classes for students. It is password protected so only the subscribed users can have access, but I have a video

presentation of the whole platform here: <https://www.youtube.com/watch?v=KKvcq9RL-7Q> (it's in Portuguese, but you can get a general idea)

I worked on this project all by myself as a solo developer.

I also designed the UI myself on Adobe Xd.

Technologies used:

React, Laravel, MySQL, Node.js

Tourist guide/Government

August 2018 - November 2020

Website: <https://conhecamarica.com.br>

Description:

This is an official government website and app for the Tourism Office of the city of Maricá, Rio de Janeiro, Brazil. The main objective was to guide visitors through all points of interest, hotels, hostels, restaurants, beaches, local stores and other places.

I worked on this project all by myself as a solo developer.

I also designed the UI myself on Adobe Xd.

Technologies used:

React, React Native, Laravel, MySQL
