

# Curriculum vitae

## Personal data

---

**Name:** Joao C.

### Technical Knowledge and Skills

Javascript, React, Python

Joao is a Software engineer and tech lead with 5+ years of experience in web development. Experienced web developer with knowledge in backend (NodeJS, TS, JS, Python, Django, Rest, GraphQL), frontend (React, JS, TS, HTML and CSS) and DevOps (AWS, Kubernetes, Terraform).

## Education

---

September 2012 –  
July 2021

**Brazil**  
Bachelor's degree in Computer Science, Federal University  
of Rio de Janeiro

## Work experience

---

January 2022 -  
Present

**Research Services company, Remote**  
Senior Software Engineer

### Stack:

- SQL
- Git
- GraphQL
- GitHub
- JavaScript
- Node.js
- React.js

- Agile Methodologies
- AWS
- TypeScript

**Responsibilities:**

- Developing features for our multi-tenant SaaS.
- Worked in a team with other developers, product owners and tech leads. Was responsible for delivery features at the backend and frontend of a web platform.
- Also collaborated with management by conducting some team meetings like retrospectives, requirement gathering and software engineering guild.
- Became the 5th most productive engineer of the team in terms of contributions (commits) to our codebase in less than 10 months.
- Acted as an engineering representative for a big client, monitoring and making sure the product was fit to that client.

November 2019 -  
December 2021

**Software Development agency, Brazil**  
Tech Lead

**Stack:**

- Microsoft Excel
- Terraform
- SQL
- Git
- JavaScript
- Node.js
- React.js
- Agile Methodologies
- AWS
- Jenkins
- Kubernetes
- TypeScript

**Responsibilities:**

- Led the development of a B2B product that grew to 100+ enterprise clients in less than a year, resulting in a \$100k in MRR for the company.
- Kept our cloud infrastructure costs under 6% of the revenue generated by the product.

- Led the team continuous improvement cycle to improve metrics like cycle time (50% decrease from 120h to 60h).
- I had an 95% satisfaction rating from the software engineers under my leadership.
- Led the creation and implementation of a machine learning system aimed in using computer vision to accelerate a manual process.

January 2018 -  
October 2019

**Software Development agency, Brazil**  
Team Lead

**Stack:**

- Microsoft Excel
- SQL
- Git
- JavaScript
- React.js
- Agile Methodologies
- Python
- Django
- Flask
- AWS
- Jenkins

**Responsibilities:**

- Led the development of a tool that managed more than R\$1 million in digital marketing spending by automating budget control and keyword bidding strategies. This tool leveraged the power of unsupervised machine learning to analyze keywords.
- Led the growth of the engineering team from 3 developers to 15 developers in less than two years.
- Contributed with an average of 2580 contributions (issues, PRs and commits) a year for the codebase while leading the team.

May 2017 -  
October 2017

**Internet Publishing company, Brazil**  
Software Engineer Intern

**Stack:**

- SQL

- Git
- JavaScript
- React.js
- Agile Methodologies
- AWS

**Responsibilities:**

- Developed new features and fixes.
- Was assigned to the identity validation team working with our huge database to implement features to prevent fraud.

September 2016 -  
March 2017

**Online Audio and Video Media company, Brazil**  
Software Engineer Intern

**Stack:**

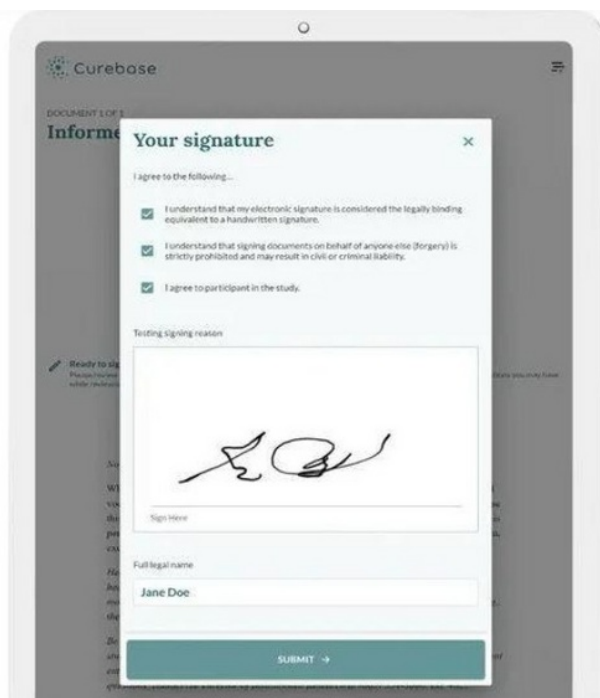

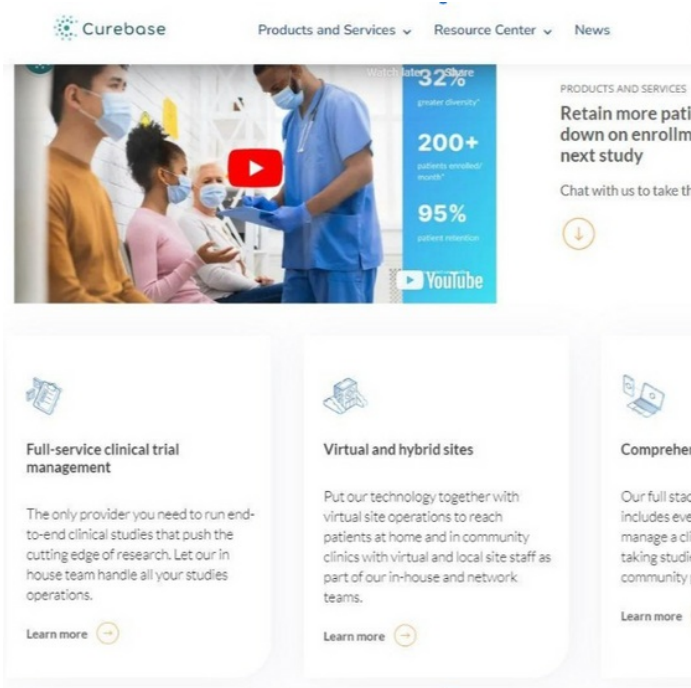

- SQL
- Git
- JavaScript
- Agile Methodologies
- Ruby
- Ruby on Rails
- PHP

**Responsibilities:**

- Developed new features and fixes.

Portfolio

---

## Clinical Management / Web app

### December 2021 - January 2023

Web app to full-service execution for modern clinical trials. It is a fullstack software platform which includes everything needed to run and manage a clinical trial end-to-end, taking studies into patients homes and community providers.

Technologies used:

Javascript, React, TypeScript, Node.js
