

Curriculum vitae

Personal data

Name: Juan F.

Technical Knowledge and Skills

Javascript, React, CSS

Juan has 5 years of experience building websites, mobile applications and rich web applications using modern web technologies such as React (plus React-native), GraphQL, AWS, Node, Ionic, Angular and multiple tools and libraries that allow him to deliver robust software that meets and exceeds the client's expectations.

He has led a small team of developers on a project spanning 1.5 years and was in charge of picking technologies and architectural decisions for it.

He has worked directly with customers following instructions and making suggestions, providing quick answers to their demands and suggesting multiple solutions to emerging necessities.

He enjoys making and learning new stuff constantly and tries to keep up to date with whatever is new and recommended in the industry.
