

Curriculum vitae

Personal data

Name: Reza M.

Technical Knowledge and Skills

Javascript, CSS, React, Node.js

Reza has been working in the software industry for more than 11 years, mostly a full-stack developer by using NodeJS, MongoDB, and Rabbitmq. He has the experience of building high-available distributed applications using microservice architecture, experience in using AWS services in different projects. Reza has been working remotely for almost five years using many remote applications such as Atlassian Products, Slack, Zoom. If you're looking for a self-learner and highly motivated developer, he is a good fit for you.
