

Curriculum vitae

Personal data

Name: Sinan S.

Technical Knowledge and Skills

Javascript, CSS, Vue.js

Sinan is a Full-Stack Developer with 14 years of experience in software development with countless successful projects. He has expertise especially in web technologies as well as windows development and hybrid mobile application development. He has very good knowledge about the current web technologies such as VueJS, AngularJS, Javascript, ASP.Net MVC, Bulma, bootstrap, etc. Also, he is confident working with Oracle, SQL Server, and PostgreSQL databases. He can easily understand spoken and written English.

Education

September 2000 –
June 2005

Istanbul, Turkey
B.S. in Computer Engineering, Kocaeli University, Faculty of Engineering

Work experience

January 2020 -
Present

Software development company
CEO/Software Architect

Stack:

- C#,
- Vue.js

Responsibilities:

- Solutions partner of some Software companies.

June 2016 -
January 2020

University, Turkey, Istanbul
Senior Software Engineer / Team Lead

Stack:

- C#,
- MS-SQL,
- AngularJS,
- MVC

Responsibilities:

- Development of Istanbul University student management web application system.

October 2014 -
June 2016

Software development company
CEO/Software Architect

Stack:

- C#,
- AngularJS,
- jQuery,
- MS-SQL,
- Oracle

Responsibilities:

- Outsource application development for various multinational and national companies.
- Development of numerous projects for companies like Unilever, BSH, Trendyol, Uyumsoft, DeFacto.

March 2012 -
October 2014

Software development company, Turkey, Istanbul
Senior Software Engineer - ERP

Stack:

- C#,
- ASP.NET,
- Oracle,
- Devexpress.

Responsibilities:

- Responsible for developing Production Module which was being used by approx. 100 companies.

- ERP Framework support and other core ERP modules support.
- Supervising HR module development, which i previously developed back in 2010.

January 2011 -
February 2012

Manufacturing company, Turkey, Istanbul
Senior Software Engineer

Stack:

- ASP.NET,
- SQL Server.

Responsibilities:

- Development of Customer Support Management System
- Web, Windows Forms, and Web Service projects developer.

September 2009 -
January 2011

Software development company, Turkey, Istanbul
Software Engineer

Stack:

- ASP.Net,
- Oracle..

Responsibilities:

- Software development responsible for Payroll module of Uyumsoft

WEB ERP.

November 2006 -
September 2009

Software development company, Turkey, Istanbul
Software Developer

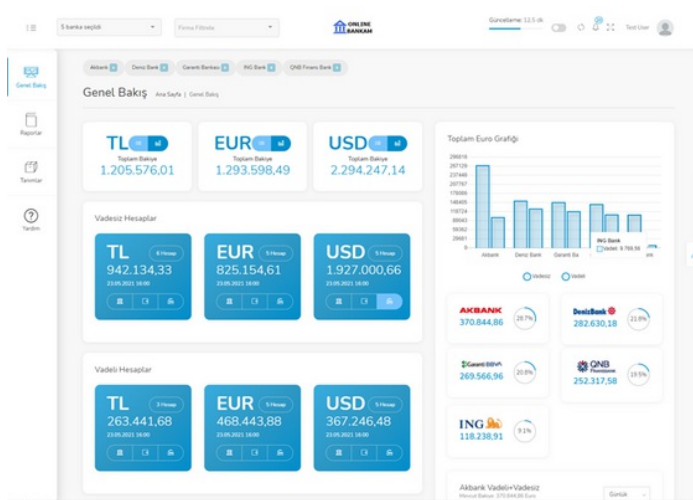

Stack:

- Sybase PowerBuilder,
- Sybase ASA DB,
- Asp,
- MySql

Responsibilities:

- Development of web and windows applications.

Portfolio

Bank Accounts Data / Finance January 2021 - March 2021

Website: <https://onlinebank.bankabakiyem.com>

Description:

The application connects to all of the banks in the country and retrieves the customer's all bank account balances and transactions in seconds, which are shown in a single application with graphics, visualization, and reports.

Role: The project team consisted of two developers and a project manager. I was responsible for the development of both backend and frontend, and also databases. Another developer was responsible for bank integrations.

I was asked to build a modern, fast, and mobile-friendly platform. After some sketch developments, I went to several customers and listened to them, performed tests with them, coordinated with the other developer, and shaped the product with the project manager.

Calling all the bank integrations asynchronously at the same time gained us speed. Now we get 350 separate account balances and transaction data for a customer in a maximum of 30 seconds. Our services are scalable restful services. We have a separate service for bank integrations which can be deployed to the customer's own servers, for security concerns, if the customer demands. We adopted PWA for this project, so customers can easily install a progressive web app on their mobile phones.

ERP System / Finance & Production

Website: <http://oratest.ofis.uyumcloud.com>

Description: A big ERP system which has hundreds of big customers and also many small ones. It serves as a cloud application for small businesses, on-premise for bigger businesses.

Role: There are more than 20 developers, several project managers, 10-15 system analysts and consultants, 3 testers, 2 DB masters, and several technical support engineers. I work at the framework development (r&d) with 2 other senior developers. Also, I sometimes work on normal developments for customer needs.

Technologies used: ASP.NET, Devexpress components, Oracle, PostgreSQL, RabbitMQ, Redis.

University Academic Management System / Education

June 2016 - January 2019

Website: <https://aksis.istanbul.edu.tr>

Description:

Istanbul University is a huge university. The application is used by all of the students, officers and academicians. It holds all the data for students, lessons, exams, grades and has a very broad range of features.

There were 6 developers, 5 system analyzers and 8-10 support personnel. I was the team lead for the last 1.5 years. I was tracking other team members' jobs while I was a developer, too. I was responsible for the exam and grade system, integrations with other organizations or banks, r&d and general system health.

I was also involved in side projects here, such as an application system for Erasmus, a planning system, quality management, etc.
